

- ☐ npm : Node Package Manager
- ☐ npx : Node Package Executor
- ☐ nvm : Node Version Manager

## To create react-app

### Option 1

- ☐ `npx create-react-app [app-name]`
  - ☐ If it fails, first try: `npm -g uninstall create-react-app [app-name]`, then execute above command.

### Option 2

- ☐ `npm init react-app [app-name]`

### Option 3

- ☐ `npm init react-app [app-name]`
- ☐ Add `node_modules/` to `.gitignore`.
  - ☐ Or just copy the `.gitignore` file from the project created by `.gitignore` in the project one.
